category: "detox-protocol"

summary: "Comprehensive guide to ZenCleans INSPIRE, a 28-day lung detoxification system that uses a unique 3-layer approach with fermented plant enzymes, herbal teas, and expectorant syrups to cleanse and rejuvenate the respiratory system from both internal and external pathways."

keywords: ["lung detox 28 days", "respiratory cleanse protocol", "mucus clearing herbs", "breathing improvement system", "fermented lung enzymes", "TCM lung cleanse"]

qa_pairs:

- question: "What is the ZenCleans INSPIRE 3-layer lung cleansing approach?"
answer: "INSPIRE uses three layers: internal bloodstream support with concentrated enzyme vials taken under the tongue, digestive system access through herbal tea blends, and external expectorant syrup to clear throat and lung mucus."
- question: "What are the main components included in the INSPIRE 28-day kit?"
answer: "The kit includes fermented plant syrup rich in selenium made from fruits and herbs, 5ml fermented plant liquid vials for clearing heavy metals, and herbal tea powder with Chinese extracts and trace minerals."
- question: "What symptoms indicate toxic lungs that would benefit from this cleanse?"
answer: "Common symptoms include persistent coughing with phlegm, shortness of breath, wheezing, chest pain, fatigue, frequent respiratory infections, and reduced lung capacity or exercise tolerance."
- question: "What dietary recommendations should be followed during the lung cleanse?"
answer: "Follow a mucus-free diet by eliminating dairy and processed foods, eat antioxidant-rich foods like berries and leafy greens, avoid refined sugar and packaged foods, and completely stop smoking during the cleanse."
- question: "How does this lung cleanse differ from traditional supplement approaches?"
answer: "Unlike traditional supplements that only support lungs temporarily, INSPIRE cleanses lungs from inside and outside using plant-based enzymes that work through the bloodstream, providing deep cellular-level nourishment and long-lasting results."

Overview

The Toxicity Entry Points

We slowly get intoxicated following the main entry points: the intestines, the lungs, and the skin. From there, the toxins penetrate the bloodstream and, carried by the blood, go through three primary filters:

- **The liver** - receives the most significant load of toxins
- **The lymphatic system** - absorbs toxic particles that have crossed the first barrier
- **The kidneys** - receives toxins when the lymphatic system is overloaded

Due to their detoxification functions, these organs gradually become saturated with impurities and require support. To help them efficiently, we must detoxify following the order in which they became impure.

The ZenCleans Way

Important Truth: There is no magic pill. We take decades to get intoxicated. When the body calls for help, it is already because it can't cope with the level of toxicity accumulated over the years. At that point, the body truly requires deep detox work.

The Unique 3-Layer Lung Approach

Typically, the standard approach to cleansing the lungs is to provide expectorants. While beneficial, this primarily operates externally.

ZenCleans INSPIRE uses a unique 3-layer approach:

1. **Internal Bloodstream Support** - A highly concentrated Chinese Medicine enzyme blend known for sensitivity to oxidation, packaged in small 5ml vials. Users administer it under the tongue and hold for a minute to facilitate direct absorption into the bloodstream.
2. **Digestive System Access** - Another blend in tea form which accesses the bloodstream through the digestive system.
3. **External Expectorant** - An expectorant syrup to help clear the mucus that may accumulate in the throat and lungs.

This holistic approach aims to deeply rejuvenate the body's organs, including the lungs, from within and without.

Traditional Chinese Medicine & Naturopathic Medicine

Traditional Chinese Medicine (TCM) Perspective

The Lungs in TCM

The lungs are one of the vital organs within the body, responsible for the proper functioning of both the respiratory system and the energy system.

Key Characteristics:

- Associated with the element of **Metal**
- Often referred to as the **"Sovereign of Qi"**

Lung Functions in TCM

The lungs are believed to be responsible for:

- Intake of clean air and expulsion of waste gases
- Playing a vital role in circulation of Qi (life energy) throughout the body
- Governing the opening and closing of the pores (closely linked with the skin)
- **"Commanding Qi"** - the ability to regulate and control flow of Qi in the body

Meridian & Organ System Connections

- Connected to other organs through the meridian system
- Any imbalance or dysfunction in the lungs can affect the functioning of other organs and systems in the body

Emotional Connections

TCM considers emotions associated with each organ. For the lungs:

- **Emotions affecting lungs:** Grief and sadness
- **Effects of excess emotions:** Can weaken lung Qi and lead to respiratory problems
- **Resulting conditions:** Shortness of breath, coughing, asthma

TCM Recommendations for Lung Health

To support lung health and balance, TCM recommends:

- Deep breathing exercises
- Maintaining good posture
- Eating nourishing foods
- Avoiding excessive grief or sadness
- Herbal medicine
- Acupuncture
- Other TCM therapies to strengthen lung Qi
- Clearing respiratory congestion
- Address imbalances or disorders related to the lungs

Naturopathic Medicine Perspective

Cleansing the lungs is a key focus in naturopathic medicine.

The Process

This process aims to:

- Remove toxins and enhance respiratory health
- Reduce mucus buildup
- Strengthen the immune system
- Improve lung function
- Better energy levels
- Reduce allergy symptoms
- Promote a healthier and more vibrant life

Systematic Cleansing Philosophy

Naturopathic medicine places strong emphasis on systematically cleansing the body, as it is believed to have direct and indirect benefits for lung health.

A systematic cleanse, often involving various detoxification practices and dietary adjustments, can help remove toxins that accumulate in the body over time.

Benefits of Systematic Cleansing

This process not only aids in overall well-being but also specifically benefits lung health through:

- Reduced mucus and phlegm production
- Improved lung function
- Strengthened immune response against respiratory infections
- Reduced inflammation in the respiratory tract

By systematically cleansing the body, naturopathic medicine aims to create an environment conducive to optimal lung health, ultimately contributing to a vibrant and thriving state of well-being.

Anatomy & Physiology

Anatomy of the Lungs

The lungs are responsible for facilitating the exchange of gases between the body and the environment. They are located in the thoracic cavity on either side of the heart.

Lung Structure

Lobes:

- **Right lung** - Larger than the left, has three lobes (upper, middle, and lower)
- **Left lung** - Has two lobes (upper and lower)

This division allows for better accommodation of the heart on the left side of the thoracic cavity.

Protective Membrane:

- Each lung is enclosed by a double-layered membrane called the **pleura**
- Helps reduce friction during breathing

Tissue Properties:

- Spongy, elastic texture
- Highly vascularized
- Contains vast network of blood vessels

Physiology of the Lungs

The anatomy and physiology of the lungs work together to ensure efficient oxygen uptake and carbon dioxide elimination essential for sustaining life.

The Breathing Process

1. Inhalation

- The diaphragm (dome-shaped muscle at the base of lungs) contracts and moves downward
- Intercostal muscles between the ribs contract
- Ribcage forces upward and outward

- Expansion of thoracic cavity lowers air pressure in the lungs
- Causing air to rush in through the nose or mouth

2. Oxygen Exchange

- Air moves into progressively smaller airways called bronchioles
- Reaches microscopic air sacs called **alveoli**
- Alveoli surrounded by network of capillaries
- Oxygen from inhaled air diffuses into the bloodstream
- Oxygen binds to the hemoglobin in red blood cells

3. Exhalation

- Diaphragm and intercostal muscles relax
- Thoracic cavity decreases in size
- Pressure in lungs increases
- Air forced out through nose or mouth
- Exhaled air removes waste gases, primarily carbon dioxide

4. Gas Exchange

- Through diffusion, oxygen moves from alveoli into capillaries
- Carbon dioxide moves from capillaries into alveoli
- Facilitates transportation of oxygen to body's cells
- Removes carbon dioxide (waste product of cellular respiration)

The Lungs in the Modern Environment

In the modern living environment, industries and smokers produce a large number of toxic substances in the air. This pollution makes human lungs and blood subject to a large degree of toxicity, causing a series of related diseases, thus endangering health and human life.

Primary Lung Functions:

- Absorb fresh oxygen
- Discharge carbon dioxide
- Exhaust gases the human body does not need

Critical Importance:

- Every important energy supply activity in the body requires oxygen
- Poor breathing can lead to various diseases
- Lungs are the most delicate organ in the human body
- Only organ directly connected with nature
- Very vulnerable to external toxicity that invades the body through this organ

Why Cleanse

Most Common Symptoms of Toxic Lungs

1. **Coughing** - Persistent cough that may produce phlegm or mucus
2. **Shortness of breath** - Difficulty breathing or feeling breathless, especially with physical exertion
3. **Wheezing** - High-pitched whistling sound during breathing, usually due to narrowed airways
4. **Chest pain** - Discomfort or aching in chest, possibly exacerbated by deep breaths or coughing
5. **Fatigue** - Feeling tired or lacking energy, often accompanied by reduced exercise tolerance
6. **Respiratory infections** - Increased susceptibility to respiratory infections such as bronchitis or pneumonia
7. **Cyanosis** - Bluish discoloration of lips, face, or extremities due to lack of oxygen
8. **Chronic cough** - Long-lasting cough persisting more than eight weeks, even after treatment
9. **Allergic reactions** - Development or worsening of allergies, such as allergic rhinitis or asthma
10. **Reduced lung function** - Decreased lung capacity, as measured by tests like spirometry, due to scarring or inflammation of lung tissue

Extended Symptoms of Toxic Lungs

- Sore throat or hoarseness
- Nasal congestion or chronic runny nose
- Headaches, dizziness, or confusion
- Chest congestion or phlegm production
- Allergy-like symptoms (itchy or watery eyes, sneezing, coughing)
- Chest pain or tightness

- Fatigue or weakness
- Unexplained weight loss
- Frequent respiratory infections
- Frequent throat clearing
- Persistent cough, especially one that worsens over time
- Shortness of breath, difficulty breathing, or wheezing like what happens to people living in polluted areas, or smokers

ZenCleansz INSPIRE 28-Day Cleanse

Product Overview

ZenCleansz INSPIRE is the third step to purifying the body systematically. This 28-day lung cleanse kit is designed to clear, detoxify, and condition the lungs, rejuvenating the body and helping it breathe more freely.

What's Included

- **Fermented plant syrup** - Rich in selenium and made of dozens of fruits, vegetables, and precious herbs that provide deep conditioning and rejuvenation
- **5ml fermented plant liquid vials** - Help clear heavy metals and debris from lung cells and moisturize, protect, and improve the respiratory system
- **Herbal tea powder** - Features Chinese herbal extracts and trace minerals, the best partners for improving lung Qi (energy)

Key Components

Organic ingredients:

- Fruits
- Vegetables
- 9 Chinese herbal extracts
- 5 trace minerals

Simply Revolutionary!

Traditional Cleansing Methods vs. ZenCleansz INSPIRE

Traditional Methods:

- Involves taking food supplements or isolated molecules that can only support the lungs, not cleanse them
- Supporting does not cleanse - implication is high maintenance and must be maintained to be effective
- If one stops, the symptoms come back
- Primarily use expectorants which are good but only work from the outside

ZenCleansz INSPIRE Advantages:

- 28 days of cleansing that will cleanse the lungs from the outside and the inside
- One time is giving a lot of deep results
- Not a magic pill - strongly suggest discovering the complete bundle
- To profoundly cleanse lungs, repeat cleanse for 12 months (one year)
- Plant-based enzymes feed the body down to the cellular level
- Compounds work through the bloodstream to strengthen lungs
- Can be repeated - enzymes are lowering inflammation and nourishing the whole body
- Deep and soft lung cleanse that can be combined with any other detox
- Purifies respiratory system
- Repairs lung function
- Improves immunity

Highlights of ZenCleansz INSPIRE

Main Benefits

- **Rejuvenate your body** - Return to natural vitality
- **Breathe freely** - Experience easier, deeper breathing
- **Detoxify lungs** - Maximize daily oxygen intake, energy, and blood circulation
- **Eliminate waste** - Remove toxins and mucus accumulated through life
- **Purify respiratory system** - Deep cleansing action
- **Repair lung function** - Restore optimal lung capacity
- **Improve immunity** - Support body's natural defenses

Additional Benefits

Modern humans' lungs have become the uncleaned "vacuum cleaner." In the contemporary living environment, industry and smokers produce many toxic substances in the air.

- Keep body rejuvenation on track
 - Add Chi super enzyme liquid to daily diet
 - Chi recommended for its rejuvenating, restoring, and strengthening effects on all body systems
-

How the Cleanse Works

Before the INSPIRE Lung Cleanse

Fasting

- It is NOT necessary to fast before doing the INSPIRE lung cleanse

Mucus-Free Diet

Eating a mucus-free diet is recommended before and during cleansing to stop the mucoid process and allow for deep liberation during cleansing.

Following a mucous-free diet while on the 28-day lung cleanse is strongly suggested.

Benefits of continuing mucus-free diet:

- Creates a healthy body
- Keeps lungs healthy

Mucus-free foods to emphasize:

- Eliminate foods that produce excess mucus
- Focus on clean, whole foods
- Avoid dairy, processed foods, and heavy foods that create mucus

Antioxidant-Rich Foods

To initiate rejuvenation and regeneration of the whole body and lung cells, it is recommended to eat antioxidant-rich foods before and during cleansing.

Adding antioxidant-rich foods is strongly recommended:

- Apples
- Blueberries
- Fruits (especially berries)
- Leafy green vegetables

Benefits:

- Incorporating antioxidant-rich foods will contribute to neutralization of free radicals
- Free radicals destroy lung cells
- Keeps them healthy

Avoid Refined Sugar & Processed Foods

Try to avoid refined sugar, processed, frozen, canned, and packaged foods before and during cleansing to stop toxin intake and allow deeper cleanse.

Avoiding processed foods:

- Bypasses lots of preservatives and toxins
- Strongly recommended to stop consumption of these foods while cleansing
- Investing in a healthful lifestyle
- Inside-out approach helps humanity and planet coexist
- Creates healthy environment

Stop Smoking

Stop smoking in order to prepare for the lung cleanse.

Additional air quality measures:

- Stop smoking for duration of lung cleanse
- Avoid secondhand smoke and pollution (indoor and outdoor)
- Poor air quality does not facilitate this cleanse

Why avoiding smoke matters:

- All types of smoke contain toxins and gas that displace oxygen in human blood
- Deprives vital organs of oxygen they need
- Avoiding smoke and poor air quality is excellent way to encourage life and vitality
- This planet is unique because of oxygen it provides to living species

During the INSPIRE Lung Cleanse

Duration

The INSPIRE lung cleanse takes 28 days to perform by taking the kit's enzymes at timed intervals throughout the day.

Self-Care Support Protocols

Cleansing is a wonderful time to focus on self-care. Many support protocols are suggested during the lung cleanse:

- **Sauna** - Heat therapy to support detoxification
- **Movement** - 30-40 minutes per day
- **Diaphragmatic Deep breathing exercises:**
 - Blow out air as long as possible
 - Use a balloon to practice
- **Neti-pots** - Nasal cleansing
- **Inhaling essential oils** - Aromatherapy support
- **Percussing/vibrating the lungs** - To stimulate and dispel mucous
- **Hot showers** - Steaming the lungs
- **Acupressure** - Pressure point therapy
- **Sleep** - 7-8 hours a night, more if needed

Detoxification Symptoms

Detox symptoms may include:

- Sneezing
- Coughing
- Mucous discharge from nose and throat
- Potential feeling of pressure from the lungs

After the INSPIRE Lung Cleanse

Results Timeline

The results of your lung cleanse will be seen in the following weeks.

What to Expect

You'll feel able to breathe more easily and deeply by the end of the cleanse.

Continuation & Maintenance

Continue on a mucus-free, antioxidant-rich, whole-food diet to maintain results. Continuing these practices will keep your lungs healthy.

INSPIRE - 28 Day Lung Rejuvenator

title: "INSPIRE 28-Day Lung Rejuvenator Product Guide"

date: "2026-01-14"

tags: ["lung-detox", "respiratory-health", "fermented-plant-medicine", "mucus-clearing", "breathing-support", "herbal-tea-blend", "lung-rejuvenation", "respiratory-detox"]

category: "product-guide"

summary: "Comprehensive guide to INSPIRE, a 28-day lung rejuvenation system containing fermented plant liquids, syrups, and herbal teas designed to detoxify, nourish, and heal the respiratory system. The formula combines traditional herbs like licorice, ginger, and ginseng with nutrient-rich ingredients to clear mucus, reduce inflammation, and enhance lung function."

keywords: ["lung detox supplement", "respiratory system cleanse", "clear mucus from lungs", "breathing support herbs", "fermented plant lung formula", "28-day lung rejuvenation"]

qa_pairs:

- question: "What are the three main components of the INSPIRE lung rejuvenator product?"
answer: "INSPIRE contains three components: fermented plant liquid, fermented plant syrup, and herbal tea powder, each with specific ingredient blends designed to support lung health."
- question: "How does ginger help with lung detox and respiratory support?"
answer: "Ginger provides anti-inflammatory and antioxidant properties that cleanse the respiratory tract, stimulates circulation to clear excess mucus, and acts as a bronchodilator to support healthy airflow."
- question: "Which ingredients in INSPIRE help clear mucus from the lungs?"
answer: "Key mucus-clearing ingredients include licorice (acts as expectorant), pineapple (contains bromelain enzyme), loquat leaves, and monk fruit, all of which help break down and clear phlegm from the respiratory system."
- question: "What makes tremella mushroom beneficial for lung health in this formula?"
answer: "Tremella is rich in polysaccharides that nourish the lungs and maintain moisture in lung tissues, preventing dryness and irritation while soothing the airways."
- question: "How long is the INSPIRE lung rejuvenation program designed to last?"
answer: "The INSPIRE lung rejuvenator is designed as a 28-day program to support comprehensive lung health and respiratory system strengthening."

Product Overview

Product Name: INSPIRE

The INSPIRE product, with its combination of fermented plant syrups, liquids, and herbal teas, is specifically designed to support lung health and the respiratory system. The ingredients in this formula offer powerful detoxifying, nourishing, and healing properties, particularly for clearing and strengthening the lungs.

Product Components & Ingredient Lists

INSPIRE - Fermented Plant Liquid

Phyllanthus Emblica, Tangerine Peel, Licorice, Ginger, Poria, Houttuynia Cordata, Honeysuckle, Luo Han Guo, Yam, Goji Berry, Red Date, Hawthorn, Raspberry, Angelica Dahurica, Lotus Seed, Mulberry Leaves, Pineapple, Lychee, Watermelon, Pear, Avocado, Orange, Kumquat, Lemon, Plum, Red Apple, Papaya, Mushroom, Grapefruit, Tremella, Daikon, Lotus Root, Winter Melon, Cantaloupe, Fennel, Coix Seed

INSPIRE - Fermented Plant Syrup

Comprehensive Fermented Liquid (Lemon, Amla, Goji Berry, Tangerine Peel, Angelica, Loquat Leaves, Licorice, Polygala, Platy codon, Red Date, Hawthorn, Raspberry, Dandelion, Ginger, Poria, Lotus Seeds, Tangerine Peel, Mulberry Leaves, Mulberry, Pineapple, Lychee, Watermelon, Pear, Avocado, Orange, Kumquat, Lemon, Plum, Red Apple, Papaya, Straw Mushroom, Mushroom, Shiitake Mushroom, Celery, Carrot, Cabbage, Bell Pepper, Bitter Melon, Tomato, Potato, Sweet Potato Leaves, Winter Melon, Cantaloupe, Broccoli, Water Spinach, Pea Sprouts, Lettuce, Fennel, Black Bean, Soybean, Coix Seed), Loquat Leaf Extract, Ginseng Extract, Menthol, Lemon Enzyme Paste, Isomalt Oligosaccharide

INSPIRE - Herbal Tea Powder

Houttuynia Cordata, Honeysuckle, Polygonatum Odoratum, Huang Qi, Licorice, Ginger, Zinc Yeast, Selenium Yeast, Vitamin B Complex, Hedyotis Diffusa, Jujube Seed, Atractylodes, Polygala, Patchouli, Phyllanthus Emblica, Chromium Yeast, Magnesium Yeast

1. Detoxing Properties for the Lungs and Respiratory System

Tangerine Peel (Citrus Reticulata)

Detoxing:

- Contains compounds like tangeretin and nobiletin, which have potent antioxidant properties
- These compounds help neutralize free radicals in the lungs and clear out environmental toxins from the respiratory tract

Respiratory Support:

- Traditionally used to relieve coughs, asthma, and phlegm
- Helps clear mucus from the lungs, promoting smoother breathing

Licorice (Glycyrrhiza glabra)

Detoxing:

- Has detoxifying effects, particularly in reducing the burden of respiratory toxins and allergens in the body

Respiratory Support:

- Acts as an expectorant, aiding the removal of mucus from the lungs
- Soothes irritated airways, easing coughs and promoting respiratory recovery

Ginger (*Zingiber officinale*)**Detoxing:**

- Anti-inflammatory and antioxidant properties help cleanse the respiratory tract by reducing oxidative stress and inflammation

Respiratory Support:

- Stimulates circulation and helps clear excess mucus in the lungs
- Acts as a bronchodilator, supporting healthy airflow to the lungs

Dandelion (*Taraxacum officinale*)**Detoxing:**

- Known for its detoxifying properties, helps purify the liver and kidneys
- Indirectly aids the lungs by reducing toxin buildup in the body

Respiratory Support:

- Used in traditional medicine to alleviate symptoms of respiratory conditions like bronchitis and asthma

Poria (*Poria cocos*)**Detoxing:**

- Acts as a natural diuretic, helping remove toxins from the body that can contribute to inflammation in the respiratory system

Respiratory Support:

- Traditionally used to relieve coughs and improve lung function by reducing dampness and phlegm accumulation

Loquat Leaves (*Eriobotrya japonica*)**Detoxing:**

- Natural anti-inflammatory and detoxifying properties help cleanse the respiratory system, promoting better lung health

Respiratory Support:

- Known for clearing phlegm, soothing sore throats, and improving breathing

Menthol**Detoxing:**

- Cooling and soothing properties help clear the airways of toxins and pollutants that affect lung health

Respiratory Support:

- Acts as a mild bronchodilator, helping to open the airways and promote better airflow in the lungs

Phyllanthus Emblica (*Amla*)**Detoxing:**

- High in vitamin C and antioxidants, which help detoxify the body by neutralizing free radicals and supporting overall immune function

Respiratory Support:

- Cooling properties are beneficial for clearing heat and mucus from the lungs and improving lung health

2. Nourishing and Healing Properties for the Lungs and Respiratory System

Wolfberry (Goji Berries, *Lycium barbarum*)

Nourishing:

- Rich in antioxidants and vitamins, strengthens the respiratory system and protects the lungs from damage caused by oxidative stress

Respiratory Support:

- Enhances lung function by improving circulation and promoting better oxygenation of the blood

Angelica (*Angelica sinensis*)

Nourishing:

- Known for its tonic effects on the respiratory and circulatory systems
- Helps nourish the lungs and improve overall respiratory health

Respiratory Support:

- Acts as a natural expectorant, helping clear phlegm and improve airflow in the lungs

Red Dates (*Ziziphus jujuba*)

Nourishing:

- High in vitamins and minerals, support overall lung health by nourishing the body and boosting energy

Respiratory Support:

- Known for its ability to support lung health by calming coughs and promoting healthy respiration

Pineapple (*Ananas comosus*)

Nourishing:

- Contains bromelain, an enzyme that helps break down mucus in the respiratory system, making it easier to clear congestion

Respiratory Support:

- Reduces inflammation and promotes smooth airflow in the lungs by helping reduce swelling in the airways

Lychee (*Litchi chinensis*)

Nourishing:

- Rich in antioxidants and vitamin C, which support lung tissue regeneration and overall respiratory health

Respiratory Support:

- Helps clear heat and dampness from the respiratory tract, beneficial for conditions like asthma or chronic cough

Mushrooms (Shiitake, Straw, Lion's Mane)

Nourishing:

- Packed with beta-glucans, which support immune function and help the body fight off respiratory infections

Respiratory Support:

- Shiitake mushrooms are particularly beneficial in improving overall lung capacity and alleviating inflammation in the lungs

Lotus Seeds (*Nelumbo nucifera*)

Nourishing:

- Known for its cooling properties, nourishes the lungs and helps clear internal heat

Respiratory Support:

- Supports lung function and can help reduce coughing and other respiratory discomforts

Tremella (*Tremella fuciformis*)

Nourishing:

- Rich in polysaccharides, which nourish the lungs and help maintain moisture in lung tissues, preventing dryness and irritation

Respiratory Support:

- Helps reduce lung dryness, making it easier to breathe and soothing irritation in the airways

3. Additional Immune-Boosting and Anti-inflammatory Ingredients

Houttuynia Cordata

Nourishing:

- A potent anti-inflammatory herb, helps reduce swelling in the respiratory system and supports healthy lung function

Respiratory Support:

- Traditionally used to treat colds, coughs, and respiratory infections
- Promotes better airflow and eases congestion

Monk Fruit (Luo Han Guo)

Nourishing:

- Naturally sweet, rich in antioxidants and helps maintain a healthy immune system, indirectly supporting lung health

Respiratory Support:

- Helps clear phlegm and mucus from the lungs, making it easier to breathe

Ginseng (Panax ginseng)

Nourishing:

- Known for its adaptogenic properties, boosts overall energy levels and helps the body adapt to stress
- Can help reduce respiratory distress

Respiratory Support:

- Enhances lung capacity and supports healthy breathing, especially during respiratory infections

Conclusion

The INSPIRE formula, with its blend of fermented plant syrups, liquids, and herbal teas, offers a comprehensive approach to promoting lung health and strengthening the respiratory system. By combining detoxifying ingredients like tangerine peel, ginger, and dandelion, with nourishing herbs like wolfberry, lychee, and lotus seeds, this product helps clear mucus, reduce inflammation, and enhance lung function. The anti-inflammatory, immune-boosting, and respiratory-supporting properties of these ingredients make INSPIRE an excellent choice for those seeking to improve lung capacity, alleviate respiratory discomfort, and support overall respiratory wellness.

LUNG MAINTANENCE PRODUCTS

Important Principle

Moving toxins to detox the body is not enough. We must ensure that these toxins will be channeled out of the body.

CHI - Immune Resilience

title: "CHI Immune Resilience Product Guide"
date: "2026-01-14"
tags: ["immune-support", "adaptogenic-herbs", "detox-supplement", "fermented-ingredients", "ginseng", "cordyceps", "reishi-mushroom", "probiotics"]
category: "product-guide"
summary: "Comprehensive guide to CHI, an immunity booster and adaptogenic supplement made with 3-year fermented ingredients including ginseng, cordyceps, and reishi mushroom. Details the detoxifying, nourishing, and immune-boosting properties of each ingredient and their combined benefits for stress resilience."
keywords: ["CHI immunity booster", "adaptogenic immune supplement", "fermented ginseng cordyceps", "immune resilience formula", "detox immune support", "stress adaptation supplement"]
qa_pairs:

- question: "What is CHI and what does it do?"
answer: "CHI is an immunity booster and body-mind adaptogen made from 3-year fermented ingredients that supports the immune system, enhances the body's adaptability to stress, and promotes overall health and vitality."
- question: "How does ginseng support immune function in CHI?"
answer: "Ginseng enhances the immune system by stimulating the production of immune cells like T-cells and macrophages, while also acting as a detoxifier that supports liver function and helps the body cope with stress and fatigue."
- question: "What makes cordyceps beneficial for immunity?"
answer: "Cordyceps enhances immune function by stimulating the production of natural killer (NK) cells and macrophages, while promoting kidney function for detoxification and boosting endurance and energy levels as an adaptogen."
- question: "How do the probiotics in CHI support immune health?"
answer: "The Lactobacillus probiotics (Acidophilus, Bifidum, Casei, Rhamnosus) maintain a healthy gut microbiome and stimulate immune responses by promoting antibody production and supporting gut-associated lymphoid tissue, which is crucial for immunity."
- question: "What are the main adaptogenic ingredients in CHI?"
answer: "The primary adaptogens in CHI are ginseng, cordyceps, and reishi mushroom (Ganoderma Lucidum), which help the body cope with physical, mental, and environmental stress while boosting stamina, energy, and immune resilience."

Product Overview

Product Name: CHI (Immunity Booster and Body-Mind Adaptogen Against Environmental Stress)

The CHI product, composed of a range of 3-year fermented ingredients, has a powerful combination of adaptogenic, detoxifying, nourishing, and immune-boosting properties. These ingredients help support the immune system, enhance the body's adaptability, and promote overall health and vitality.

Ingredient List

Ginseng, Cordyceps Sinensis, Goji Berry, Reishi, Roselle, Apple, Cauliflower, Lemon, Nightshade, Papaya, Pineapple, Asparagus, Bitter Melon, Black Ear Mushroom, Burdock, Loofah, Chayote Leaves, Ginger, Dragon Fruit, Grapefruit, Kiwi, Loquat, Malay Spinach, Mulberry, Mushroom, Okra, Peach, Shiitake, Spinach, Yam, Green Algae, Seaweed, American Ginseng Extract, Bamboo Ginger, Brown Sugar, Arabinose, Lactobacillus Acidophilus, Lactobacillus Bifidum, Lactobacillus Casei, Lactobacillus Rhamnosus, Vitamin B3, Isomaltoligosaccharide

1. Detoxing Properties and Immune Support

Ginseng (Panax ginseng)

Detoxing:

- Excellent detoxifier that helps clear toxins from the body, particularly by supporting liver function and reducing the accumulation of waste products

Immune System Support:

- Enhances the immune system by stimulating the production of immune cells like T-cells and macrophages, which help fight off infections and boost the body's defense mechanisms

Adaptogenic Effect:

- As an adaptogen, ginseng helps the body cope with stress and fatigue, regulating hormonal balance and maintaining overall energy levels

Cordyceps Sinensis

Detoxing:

- Helps in detoxification by promoting proper kidney function and flushing out toxins through the urinary system

Immune System Support:

- Well-known for its ability to enhance immune function, stimulating the production of natural killer (NK) cells and macrophages, which help fight infections and boost immune resilience

Adaptogenic Effect:

- Improves the body's ability to adapt to physical and mental stress by boosting endurance, stamina, and energy levels, making it an excellent adaptogen

Ganoderma Lucidum (Reishi Mushroom)

Detoxing:

- Known for its detoxifying properties, supports the liver and kidneys, which are essential in removing toxins from the body

Immune System Support:

- Potent immune system modulator, enhancing both innate and adaptive immune responses
- Increases the activity of T-cells, macrophages, and natural killer (NK) cells, which help the body combat infections and inflammation

Adaptogenic Effect:

- Helps manage stress, enhances mental clarity, and balances the immune system, making it a key adaptogen in the formula
- Promotes longevity and vitality by balancing body functions

Wolfberry (Goji Berries)

Detoxing:

- Acts as a gentle detoxifier, clearing toxins from the bloodstream and supporting the liver's detoxification pathways

Immune System Support:

- Rich in vitamin C, antioxidants, and polysaccharides, strengthens the immune system, enhancing the body's resistance to infections

Adaptogenic Effect:

- Helps boost energy levels, improve mental function, and help the body adapt to stress
- Considered an adaptogen due to their ability to restore balance and promote vitality

Roselle (Hibiscus Sabdariffa)

Detoxing:

- Supports the body in detoxifying by promoting healthy digestion and acting as a mild diuretic to flush out excess waste and toxins

Immune System Support:

- Rich in vitamin C and antioxidants, helps boost immunity, fight off infections, and reduce inflammation

Adaptogenic Effect:

- Has a calming effect on the body, helping it recover from stress and promoting emotional balance

Asparagus (Asparagus officinalis)

Detoxing:

- Known for its detoxifying effects, helping the kidneys filter out toxins and reduce inflammation in the body

Immune System Support:

- Rich in antioxidants, vitamin C, and fiber, all of which support the immune system and promote digestive health

Adaptogenic Effect:

- Helps the body cope with physical stress and enhances the body's natural resilience, supporting overall well-being

Burdock (Arctium lappa)

Detoxing:

- Well-known for its ability to detoxify the liver and skin by promoting the removal of toxins through sweat and the urinary system

Immune System Support:

- Helps modulate immune function, supporting the body in its fight against infections and promoting overall health

Adaptogenic Effect:

- Helps the body adapt to environmental stressors, improving energy levels and overall vitality
-

2. Nourishing Properties for Immune Support and Adaptogenic Function

Apple (*Malus domestica*)

Nourishing:

- Rich in fiber, vitamin C, and antioxidants, supporting digestive health and immune function by neutralizing free radicals

Adaptogenic Effect:

- The sugars and polyphenols in apples help stabilize blood sugar levels, contributing to overall balance and promoting energy

Kiwi (*Actinidia deliciosa*)

Nourishing:

- Packed with vitamin C, vitamin E, and antioxidants, which support immune function and protect against oxidative damage

Adaptogenic Effect:

- Helps the body adapt to stress by promoting healthy digestion and nutrient absorption, ensuring the body stays energized and balanced

Pineapple (*Ananas comosus*)

Nourishing:

- High in vitamin C and bromelain, an enzyme that aids digestion and has anti-inflammatory effects

Immune System Support:

- Antioxidants and enzymes support the immune system by enhancing the body's ability to process nutrients and neutralize toxins

Adaptogenic Effect:

- Helps maintain digestive health, ensuring that nutrients are absorbed efficiently and helping the body handle stress

Lactobacillus Probiotics (*Acidophilus*, *Bifidum*, *Casei*, *Rhamnosus*)

Nourishing:

- Essential for maintaining a healthy gut microbiome, which is central to immune function and overall health

Immune System Support:

- Lactobacillus strains stimulate immune responses by promoting the production of antibodies and supporting the gut-associated lymphoid tissue (GALT), which is crucial for immunity

Adaptogenic Effect:

- Probiotics help balance the gut, improving digestion, nutrient absorption, and reducing the impact of stress on the body

3. Overall Adaptogenic and Immune-Boosting Benefits of CHI

Ginseng, Cordyceps, and Ganoderma Lucidum serve as the primary adaptogens in this formula, helping the body better cope with physical, mental, and environmental stress by boosting stamina, energy, and immune resilience.

The antioxidants, anti-inflammatory compounds, and immune-stimulating properties in ingredients like wolfberry, ginger, and rose hip further enhance the body's defenses, preventing infections and promoting overall health.

Together, the ingredients in CHI not only provide immune support but also enhance the body's adaptability, enabling it to maintain balance and vitality in the face of stressors, ultimately leading to a stronger, more resilient body.

Conclusion

CHI is a powerful blend of adaptogenic and immune-boosting ingredients, enhanced by 3-year fermentation for maximum potency. The product detoxifies, nourishes, and heals the body, supporting the immune system through ingredients like ginseng, cordyceps, and ganoderma while helping the body adapt to stress. With its array of probiotic, antioxidant, and anti-inflammatory ingredients, CHI promotes overall health and helps the body build resilience against both chronic stress and environmental challenges.

Questions About ZenCleansz INSPIRE Ingredients

Trace Minerals Explanation

Zinc, Magnesium & Chromium

These are essential minerals that play various roles in bodies, including supporting lung health (as detailed in the Trace Minerals section above).

Frequently Asked Questions

What Can I Expect? What are Possible Detoxification Symptoms?

The INSPIRE lung cleanse is a lung strengthener. It is a very gentle cleanse with accumulative benefits.

How it works:

- Strengthening the lungs allows the body to continue pushing oxygenation into the furthest reaches of the body
- Helps alkalize and detoxify the body for some time

Possible detoxification symptoms include:

- Headaches
- Feeling of a mild cold
- Sniffing
- Coughing
- Runny nose
- Phlegm
- Sense of dryness
- Heaviness in the chest

Important note:

- Symptoms vary but continue to subside as the month moves forward
- You'll feel able to breathe more easily and deeply by the end of the cleanse

How Can I Maximize This Cleanse?

- Get plenty of fresh air
- Research breathing exercises
- Focus on oxygenating your body
- Percussing or vibrating the lungs to dispel mucus will be helpful
- Neti pots helpful
- Inhaling essential oils helpful
- Make sure to get adequate sleep

How Many INSPIRE Kits Do I Need to Do? How Often May I Do the Cleanse?

This answer is interdependent on individual needs.

Key points:

- INSPIRE helps improve lung strength and breathing while nourishing cells systemically
- As one starts noticing improvements in their lungs, they can determine how many and how often the INSPIRE cleanse should be done

May I Do Other Cleanses at the Same Time?

The ZenCleansz 5 Element Detox kits can be layered together; however:

- When doing the ONE intestinal cleanse, focus only on that cleanse for that day
- After the intestinal cleanse, one may layer the other cleanse protocols on the same day
- If you begin with the ONE intestinal cleanse as a part of the RAINBOW cleanse, you can start layering the other 5 Elements Detox kits on day two
- Don't combine the different kits' enzymes, but spread enzyme intake throughout the day

How Natural Enzyme Blends Cleanse the Lungs

Four Key Mechanisms

1. By protecting and improving the respiratory system:

- Using natural blended enzymes is much more refined and effective
- Enters the bloodstream with its health properties over this 28-day cleanse

2. By improving nutrient absorption:

- When eating proper enzymes and getting right balance of nutrients
- Body naturally feels 'full' and can easily control amount eaten
- Promotes healthy energy levels
- Helping stay active and vibrant

3. By helping clear up heavy metals and debris from cells:

- Can separate heavy metals from blood
- Decompose toxins harboring in cells
- Natural enzyme therapy uses high levels of good-quality enzymes
- Seek and eliminate harmful substances hiding in body

4. By balancing and conditioning the body systems:

- Enzymes promote cell metabolism
- Enhance physical strength
- Encourage cell regeneration

Why Choose ZenCleans?

Core Philosophy

Cleanse Every Organ and System With Power and Grace

Our Approach

We are solely focusing on holistic natural self-care and are creating a new self-care system with you. We share natural medicine values and holistic principles through:

- Education
- Coaching
- Life experience
- Self-empowerment

Our Methods

Blends of wisdom and science fermented over 3 years for a profound natural enzyme therapy.

Chi-Tech Nutrition Foundation

Our approach combines:

- Traditional Chinese Medicine
- Organic Farming
- Naturopathic Medicine
- Science

The 5 Elements & Body Systems

System Overview

The ZenCleans 5 Element Detox & Rejuvenation System addresses different body systems and detox pathways:

1. **Element 1 - EARTH** - Digestive Tract
2. **Element 2 - WOOD** - Liver
3. **Element 3 - METAL** - Lungs
4. **Element 4 - FIRE** - Blood & Lymph
5. **Element 5 - WATER** - Kidneys & Hormones

Each element corresponds to Traditional Chinese Medicine's fundamental organ systems and represents a layer of detoxification.

Summary

Key Takeaways

1. **Three-Layer Approach** - ZenCleans INSPIRE uniquely addresses lung health from external, internal bloodstream, and digestive pathways simultaneously
2. **28-Day Deep Cleanse** - Provides profound results through enzyme therapy that penetrates at the cellular level
3. **Comprehensive Support** - Success requires dietary modifications (mucus-free, antioxidant-rich), self-care practices, and environmental changes
4. **Heavy Metal Clearance** - Specialized enzymes help eliminate heavy metals and debris that accumulate in lung tissue
5. **Gentle Yet Powerful** - The cleanse is gentle with accumulative benefits that strengthen lungs over time
6. **Long-Term Wellness** - Designed to be repeated as needed, with maximum benefit when integrated into the 6-month complete 5-Element system
7. **Modern Environmental Response** - Specifically formulated for contemporary challenges of air pollution and environmental toxicity that modern lungs face
